DETAILED ACTION

Claims 1-17 and 19-21 were cancelled. Claim 18 had subject matter which was indicated as allowable in the previous office action. That subject matter is still allowable.

Please note that in the remarks applicant filed on 8/30/2005 that applicant confirmed that applicant's claim to priority based on application 09/632,696 was filed in error and that applicant is not entitled to an earlier effective filing date than the actual filing date of the current application, which is 12/4/2001.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Timothy O'Hagan (Agent registration #: 39319) on 11/10/2005. The amendments are to fix a 101 error and to remove a comma, which appears to be a typo.

The application has been amended as follows:

REPLACE CLAIM 18 AS FOLLOWS:

An improved method for encryption implemented via hardware circuit(s) including multiplication over a finite field, the improvement comprising:

obtaining the result of multiplication over a finite field using a primitive power and log table comprising 2 rows, wherein obtaining the result of multiplication over the finite

field comprises obtaining the result of multiplication over a Galois field(2^8) performed in the MixColumns transformation and in the InvMixColumns transformation of the AES algorithm using a 2 by 256 primitive power and log table, comprising the steps of:

- looking up logs of terms being multiplied over the Galois field(2^8);
- summing the logs to obtain a sum; and
- looking up the anti-log of the sum.

Note that support of the amendment wherein the method for encryption is implemented via hardware circuit(s) can be found on page 6, lines 2-8 of the specification as well as other places in the specification.
